

# Stainless Steel

Stainless Steel alloy 304 is a general purpose alloy, very durable and easy to maintain in exterior and interior applications. Alloy 316 performs better in highly corrosive, salt air environments, such as industrial, coastal vicinities or areas know for high levels of atmospheric pollution. **All stainless steel products are automatically passivated when used in exterior applications, at no additional charge.** This process aids in inhibiting oxidation and staining. See page 79 for additional information on "Passivation".
